

1. What is *HR Connect*?

HR Connect is Treasury's primary human resource system that provides a broad range of applications, services and information to HR offices, employees, and managers. You can view your employment information, update your personal information, and manage your leave. *HR Connect* can help supervisors manage their human capital and use organizational data for strategic decision-making. Supervisors are able to initiate paperless personnel actions and electronically route those actions for approval, reducing the time it takes to process a personnel action.

2. Why use *HR Connect*?

It's faster, more efficient, and more accurate than the paper processes we've all been using. Also, *HR Connect* is an integrated HR system. This means that, as we build additional modules, HR information will only need to be entered one time, whether it's being used for hiring, training, performance management, or for any other HR purpose. This improves the accuracy of the information in the system and allows HR to operate more efficiently. *HR Connect* allows you to take charge of your own career, manage your benefits, and own your own information.
