A Biden-Harris Administration priority is keeping the United States' semiconductor supply chain secure, robust, and resilient for the national security and economic prosperity of the United States. In 2022, President Biden signed the CHIPS and Science Act into law, announcing a nearly $53 billion investment in U.S. semiconductor manufacturing, research and development, and workforce. Since the introduction of the CHIPS and Science Act, dozens of investment projects in the semiconductor industry have been announced, resulting in over $395 billion of commitments to invest. These projects will create tens of thousands of new, high-quality jobs, as well as hundreds of thousands of supported jobs throughout the broader U.S. economy. With these investments, the United States is projected to produce roughly 20% of the world's leading-edge logic chips by 2030. Furthermore, for the last 10 years, the United States was the top source market and among the top destination markets for greenfield foreign direct investment (FDI) project announcements in the semiconductor sector.

SelectUSA seeks to encourage and maintain the resiliency of the U.S. competitive advantage in this industry by attracting FDI in this critical industry. This snapshot explores top foreign markets of parent companies operating in the semiconductor industry to help economic developers gain a better understanding of the global landscape.

### Top Source Markets by Estimated Capital Expenditure in the Semiconductor Industry

- **Taiwan**: $113B invested globally, $46B invested in the U.S.
- **South Korea**: $37B invested globally, $19B invested in the U.S.
- **United Kingdom**: $22B invested globally, $775M invested in the U.S.
- **Germany**: $16B invested globally, $1B invested in the U.S.
- **China**: $9B invested globally, $190M invested in the U.S.

### Top 5 Foreign Markets for Global Parent Companies in the Semiconductor Industry

**Reported Annual Revenue (in USD billions)**

- **Japan**: 753, 4,241,850 employees
- **Taiwan**: 540, 1,842,873 employees
- **Sweden**: 484, 1,320,165 employees
- **China**: 383, 1,040,169 employees
- **Germany**: 289, 334,765 employees

7. Uniworld is an online database reporting business contact information from over 200 countries and 20,000 industries. Accessed March 2024. Data includes foreign parent companies operating in the North American Industry Classification (NAICS) industry code 3344 and exclude any companies that do not report either annual revenue or number of employees. This dataset does not reflect all companies in the semiconductor industry.
Globally in 2022, semiconductor and other electronic component manufacturing industry goods exports were valued at $1.8 trillion.\textsuperscript{8}

Regionally, Asia has the largest share of semiconductor exports by trade value, accounting for 80 percent of global exports in 2022. Europe (12 percent) and North America (7 percent) followed with the next largest shares.\textsuperscript{9}

Economic developers may consider trade flows to identify where major semiconductor and other electronic component manufacturing industry production is located.

Top 3 Markets in Major Semiconductor Subsectors by Export Value\textsuperscript{10}

SelectUSA is the U.S. federal government investment promotion program that facilitates and promotes job-creating business investment into the United States. SelectUSA’s team of experts support U.S. Economic Development Organizations in their location promotion plans by providing credible and unbiased data, analytics, and on-the-ground information from embassies and consulates across more than 70 foreign markets.
